SUMMARY

Data Analyst with 2+ years of experience delivering end-to-end analytics across sustainability, aerospace, real estate, and AI. Skilled in Python, SQL, and Power BI; proven record of converting complex datasets into actionable insights that drive measurable outcomes. MS in Business Analytics at UMass Amherst; Phi Kappa Phi inductee (top 10% of graduate class).

EXPERIENCE

Data Analyst | Student Researcher

Mar 2026 – May 2026

University of Massachusetts

Amherst, MA

- Designed a **Python-SQL** data system from scratch, identifying **33 waste drivers** and surfacing **\$1,500+** in weekly avoidable operational costs, enabling immediate management corrective action.
- Built **Power BI** dashboard with custom DAX measures, surfacing **\$1,722** in cost impact and giving **5 stakeholder teams** self-serve, real-time access to critical performance KPIs.
- Delivered **3 cross-functional** analytical reports on schedule, translating sustainability data into strategic insights that informed key decisions and saved hundreds of operational hours.

Data Analyst

May 2023 – Jun 2024

Data Patterns

Chennai, India

- Built **Python, C++**, and **SQL** validation scripts, proactively preventing **20+** monthly data quality issues and reducing downtime across aerospace mission-critical systems.
- Applied statistical analysis to complex operational datasets, identifying **4 major process bottlenecks** and establishing cross-functional reporting standards adopted by Engineering teams organization-wide.
- Analyzed **100+** system logs and protocol transactions to identify root causes of software-hardware integration issues, reducing troubleshooting time and improving system reliability during aerospace platform development.

Business Analyst & Project Lead

May 2022 – May 2023

Aditya Estates and Builders

Chennai, India

- Engineered **Python** scripts to scrape **1M+** location data points, informing **3 product feature enhancements** and directly improving strategic site selection accuracy for business expansion.
- Deployed **Python** and **SQL** predictive demand models to forecast real estate market trends, enabling data-driven feasibility studies for **multi-million-dollar** land acquisition decisions.
- Designed **ArcGIS** geospatial dashboards and executive reports, translating complex market data into strategic insights that directly influenced major business expansion investment decisions.

PROJECTS

Amazon Prime Air — Drone Delivery Strategy

[Link](#)

- Analyzed regulatory, operational, and market data across 3 target markets to develop a comprehensive drone delivery strategy for Amazon Prime Air.
- Conducted demand forecasting and route optimization models, delivering quantitative market-entry and scaling recommendations for enterprise adoption.

Diabetes Case Prediction — ML for Public Health

[Link](#)

- Engineered a 7-model ML pipeline on 253,680-patient CDC BRFSS dataset, applying SMOTE oversampling to resolve class imbalance and achieving 75.22% diabetes detection recall with Logistic Regression.
- Performed feature engineering across 25 health and lifestyle variables, identifying High Blood Pressure, BMI, and General Health as top predictors, delivering clinically interpretable risk stratification.

SKILLS AND CERTIFICATIONS

Languages & Tools: SQL, Python, Power BI, Tableau, AWS, Snowflake, Looker, Streamlit, ArcGIS, Jira, C/C++, Bash, ETL

Skills: Statistical Analysis, Data Visualization, Geospatial Analytics, Financial Modeling, Business Strategy, Stakeholder Communication, Project Management

Certifications: AWS Academy ML Foundation, Google Data Analytics, DataCamp Data Analyst Associate

EDUCATION

MS in Business Analytics

Aug 2024 – May 2026

University of Massachusetts, Amherst · Phi Kappa Phi Honor Society — Top 10% of graduate class

B.Tech in Computer Science, AI & ML Specialization

Aug 2019 – Jul 2023

Sri Ramachandra Institute of Higher Education
